

Word problems

Name _____

Date _____

Read each problem, set out the calculation or equation and write a complete answer.

1. Four trays hold six bread rolls each. How many rolls are there altogether?

2. Maya has 35 minutes before dinner. She reads for 18 minutes; how many minutes remain?

3. Three friends collect eight conkers each. They share them equally between four children. How many conkers does each child receive?

4. A class needs 50 paper cups. The cupboard contains 32 cups; how many more are needed?

5. Five window boxes each contain seven seedlings. Nine seedlings fail to grow; how many plants grow?
